

iPad in the Primary Classroom

Educators in the primary classroom are using iPad to create interactive, purposeful and engaging experiences for their learners. iPad inspires creativity, encourages collaboration and challenges learners to solve problems with their own unique talents.

Apple invites you to an immersive professional learning experience where you will discover how to get started or enhance your existing iPad program. You will hear from experienced educators and leave with a toolkit of ideas and activities you can start tomorrow.

Classroom teachers of Year 3-6 and school leaders are invited to join us at Adelaide Zoo to take learning out of the classroom at our inaugural technology safari.

Who should attend

This event is intended for leaders and educators responsible for years 3-6 in their school. As a team-based experience you will gain more from this event if you have a team of three attend:

- A member of your leadership team
- Two teachers of years 3-6

Details

17 September, 2018
8:30 am - 3:30 pm
Sanctuary at Adelaide Zoo
Frome Road
Adelaide, SA, 5000
